Shell Selects Industrial Evolution for PI System Deployment at Their Research Facilities

Project covers facilities in the USA, Netherlands, Germany, India and China

This project consists of requirements gathering, solution architecture, resource planning and deployment of PI System components (PI buffer nodes and interfaces, PI Asset Framework and PI Notifications) and client tools (PI ProcessBook, PI DataLink and PI Coresight). Industrial Evolution's role is to design, plan and coordinate the deployment of all these products at all Shell's research facilities around the world.

About Industrial Evolution

Founded in 2000, Industrial Evolution was an innovator in offering Data-as-a-Service to the industrial market. We collect real-time process data from systems and devices, and make it available securely via the internet.

In January 2016, Yokogawa Electric Corporation announced the acquisition of Industrial Evolution to strengthen its provision of advanced solutions to the process industries. The acquisition of Industrial Evolution, a provider of cloud-based plant data sharing services, was carried out through Yokogawa Venture Group, Inc., a wholly owned Yokogawa subsidiary. The press release is available at:
