Momentive Specialty Chemicals Selects Industrial Evolution to Assist with Raddical Replacement

Momentive plans to replace the now-obsolete Raddical real-time data visualization tool with standard PI System components

Based in Columbus, Ohio, Momentive Specialty Chemicals Inc. is the global leader in thermoset resins. Their largest manufacturing plant is located in Deer Park, TX and uses the PI System to manage all their real-time production information. Momentive had inherited a legacy data visualization tool called Raddical from its former owner, Shell. Raddical is no longer supported and Momentive was looking for a replacement consistent with their commitment to the PI System. Momentive hired Industrial Evolution to investigate replacement options and design and implement the new solution using PI ProcessBook and PI AF. One of the biggest areas of improvements will be bringing all their lab testing data into the PI system - a feature that did not exist previously.

About Industrial Evolution

Founded in 2000, Industrial Evolution was an innovator in offering Data-as-a-Service to the industrial market. We collect real-time process data from systems and devices, and make it available securely via the internet.

In January 2016, Yokogawa Electric Corporation announced the acquisition of Industrial Evolution to strengthen its provision of advanced solutions to the process industries. The acquisition of Industrial Evolution, a provider of cloud-based plant data sharing services, was carried out through Yokogawa Venture Group, Inc., a wholly owned Yokogawa subsidiary. The press release is available at: <http://www.yokogawa.com/pr/news/2016/pr-news-2016-0107-en.htm>.
